

New terminal 2i10 PCI ped certified

2i Informática industrial gets the PCI for its PIN pad 2i10

2i Informática Industrial update the security certification for the PIN pad, the old model PP 2000 C had the Visa ped certification, now the 2i10 has the PCI ped.

Desde hace mas de 20 años 2i Informática industrial viene dando soluciones a estaciones de servicio, entre ellas los medios de pago. 2i informática Industrial ha renovado la certificación de seguridad de su conocido terminal PP2000C para adaptarlo a los nuevos tiempos. Since more than 20 years 2i Informática Industrial has been given solutions to gas stations, some of them in the payment methods. 2i Informática industrial has been update the Pin pad in order to adapt the terminal to new age. The 2i10 is as easy to work with as the old one. As strong, as efficient as the old one but more secure. Shape, and image is the same, but with the new certification, we have included a new keyboard with traditional key. The connection with this terminal is done through a RS232 and like the old one can manage DUKPT and master session key. For more info, please click here .
