

## Available the EMV attended payment system

2i Informática Industrial has developed a EMV solution for payment in attended environment. This system allows through a PIN pad Verifone Nurit 293 connected to our system do transactions in attended environment in the most secure way.

The payment system is very flexible. Has been developed thinking in our customers but also in possible integrators. This solution perfectly fits in our control system 2iwin, allowing the transactions in the most secure payment procedure. Even small business can switch from several payment services for a transaction to only one. For integrators is easy as the few commands to manage in order to do a transaction. All components integrated in this solutions has been passed all security certifications. The system is very easy to install in environments already working. A simple software update and the connection of the hardware would be enough to start working. For more info don't hesitate to contact us, we would be pleased to answer all of your doubts and questions.
